Insights from our lunch

New Blood. Blood , as the source of life and movement . New blood of young people who will lead transformation , who will regenerate and apply the old message of the prophets regarding peace and love, rather than shedding blood of each other. Transmitting into the veins of modern civilization new blood that is radiating purity, humanity and love rather than Ego, hatred and separation . A new heart, new blood to resurrect Europe? The World? What course of blood transfusion will we choose? New blood of love , modesty and wholeness? or old dirty blood of hatred , vanity and separation .
